Summary

Senior Full Stack Engineer | MERN Stack Specialist

I am a Senior Full Stack Engineer with over 6+ years of experience focusing on the MERN stack, adept at building high-performance web applications for Fortune 500 clients including **American Express, DISA and Honeywell.** I specialize in integrating cutting-edge technologies to resolve critical issues and enhance user experiences. My passion for problem-solving, team collaboration, and continuous learning propels me to drive impactful project results

Experience

Concentrix Catalyst

Bengaluru, India

Software Engineer II 11/2025 - ***Present***

Concentrix Catalyst is a global technology and services leader that powers the world's best brands. It designs, builds, and runs fully integrated, end-to-end solutions at speed and scale across the entire enterprise, helping more than 2,000 clients solve their toughest business challenges.

- Resolved critical security vulnerabilities using Helmet.js security headers, Express-validator input sanitization, and homoglyph attack prevention achieving full SDE compliance.
- Fixed hardware simulator UI defects and developed JSON server data persistence feature, improving application reliability and user experience.
- Designed and implemented encryption POC for securing Node-RED flow credentials using AES-256-GCM encryption, protecting sensitive authentication keys and data fields.
- Delivered major UI enhancements across the application, resolving rendering issues, improving responsiveness, and reducing user-reported defects by 40%.
- Architected SQLite + MQTT + RDTS integration POC and developed custom Node-RED nodes for real-time IoT data processing with message-driven persistence architecture.
- Authored BDD test cases using Cucumber.js and developed RESTful APIs with Express.js, implementing authentication, validation, and error handling middleware.

GlobalLogic India Pvt. Ltd

Noida, India

Software Engineer 04/2022 - 11/2025

GlobalLogic India Pvt. Ltd. is a leading digital transformation company that empowers organizations to streamline and improve software development processes.

- Migrated over 100,000 lines from ASP.NET to MERN stack (MongoDB, Express, React, Node), improving performance by 321%.
- Designed and implemented scalable RESTful APIs with Node.js and Express.js for secure, high-performance data flow.
- Integrated MongoDB with efficient schema design, indexes, and aggregation pipelines, reducing query time by 40%.

- Followed TDD using Jest and Enzyme, achieving 95% unit test coverage and production-ready code quality.
- Delivered responsive React.js interfaces with seamless API integration and cross-browser compatibility.
- Automated deployment pipelines through Bitbucket and CI/CD to enhance release reliability.
- Guided a 9-member team as Proxy Lead, promoting best practices and code quality improvements.
- Applied Domain-Driven Design (DDD) for modular structuring, improving maintainability and code reuse by 50%.
- Integrated Azure App Insights and SonarQube to monitor Node.js performance and ensure coding standards.
- Engineered real-time notifications using SignalR, Node.js, and React hooks, optimizing UI responsiveness.
- Collaborated with US clients to define business requirements and manage JIRA stories for timely sprint delivery.

PureSoftware Pvt. Ltd

Noida, India

Software Engineer

06/2019 - 06/2021

PureSoftware Pvt. Ltd. delivers innovative technology solutions through expert software development.

- Contributed to the development of a responsive web app, resulting in a user base of over 1500 active users within two months.
- Enhanced user engagement by 15% through A/B testing and data-driven UI design changes analysis.
- Leveraged JavaScript ES6 to optimize critical sections of the codebase, resulting in a 15% improvement in application speed.
- Developed a Single Page Application (SPA) for a better user experience.
- Utilized Bitbucket for version control and code collaboration, ensuring seamless integration with continuous integration tools.
- Worked in an internationally distributed team and with a US client.
- Collaborated directly with customers and engineers to align on exact solution requirements.
- Participated in technical discussions and feature design activities.
- Implemented comprehensive unit tests using Jest and Enzyme, reducing the defect rate by 20%.

Education

Raj Kumar Goel Institute of Technology

Ghaziabad, UP

B.Tech (Computer Science and Engineering)

08/2015 - 06/2019

Key Achievements

Awards & Recognition

- Spotlight of the Month in Concentrix Catalyst **(January 2026)**
- Client Appreciation Award in GlobalLogic **(April 2024)**
- Bingo Award in PureSoftware **(February 2020)**
- Star Performer Award Twice in GlobalLogic **(2024 & 2025)**
- Spotlight of the Month in GlobalLogic **(January 2023)**
- Led a Team of 9 Members

Skills

Frontend Development: React.js, Redux, Redux Saga, Zustand, TypeScript, JavaScript ES6+, HTML5, CSS3, SCSS/SASS, Tailwind CSS, Material UI, Daisy UI, Custom Hooks, Responsive Design

Backend Development: Node.js, Express.js, RESTful APIs, GraphQL, MongoDB, Mongoose, AWS, Nginx, SQL, Redis, API Design, Payment Gateway Integration, JWT Authentication, OAuth2, Docker, Kubernetes, Azure App Insights, SignalR, SonarQube

Testing and Quality: Jest, Enzyme, React Testing Library, TDD, BDD Cucumber, Unit Testing, E2E Testing, SonarQube

DevOps & Tools: Git, Bitbucket, Azure DevOps, CI/CD Pipelines, Webpack, Babel, Postman, Azure App Insights

Project Management: Agile, Scrum, Jira, Leadership, Team Mentoring

Soft Skills: Problem Solving, Communication, Documentation, Teamwork, Client Collaboration

Languages: English, Hindi
